Question:

Separate Integers and Alphabets from a Alphanumeric String.

Input: `String s="a1b10c130";`

Outpu: abc 140

```java
public class Alphanumberic {

    void separateIntegerandAlphabets() {

    String s="a1b10c130";
    String res="";
    int ans=0,k=0;

    for(int i=0;i<s.length();i++) {
    if(Character.isAlphabetic(s.charAt(i))) {
            res+=s.charAt(i);
            ans+=k;
            k=0;
        }else {
            k=(k*10)+(s.charAt(i)-'0');
        }
    }

    ans+=k;
    System.out.println("Alphabets:"+res+" Sum:"+ans);
    }

}
```
